

A child wearing a blue cap, an orange t-shirt, and black pants is skateboarding on a ramp. The ramp is painted with vibrant, wavy patterns in shades of blue, orange, black, and yellow. The child is in a crouched position, balancing on the skateboard. The background shows more of the ramp's colorful design, with a person visible in the distance on another part of the structure.

11 October 2013

Programme of the day

Kick off Symposium

Gravitation programme

Consortium on Individual Development (CID)

***Why some children thrive,
and others don't***

Programme of the day

9:30 - 10:00 a.m. Welcome and registration

10:00 a.m. Introduction
Prof. dr. Chantal Kemner
University Utrecht, The Netherlands

10:15 - 12:15 a.m. The development of reproductive strategies
Prof. dr. Jay Belsky
University of California, Davis, USA

Environmental regulation of the neural epigenome
Prof. dr. Michael Meaney
McGill University, Montréal, Canada

12:15 - 1:30 p.m. Lunch and scientific market

1:30 - 3:30 p.m. The genetics of DNA methylation and of
brain structure and function
Prof. dr. Nick Martin
University of Queensland, Australia

Media effects on children and adolescents:
A differential susceptibility perspective
Prof. dr. Patti Valkenburg
University of Amsterdam, The Netherlands

3:30 p.m. Tea and coffee
